BALGANESH ENTERPRISES

BALGANESH ENTERPRISES – CLEANROOM WIPES MATERIAL OVERVIEW

Knitted Polyester Wiper

Woven Polyester-nylon Composite Microfiber Wiper

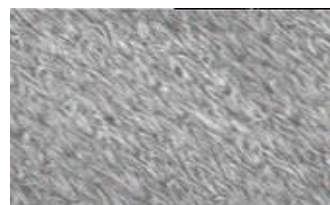

Knitted Polyester-nylon Composite Microfiber Wiper

Polyester Fiber Wiper

Polyester Microfiber Wiper

Polyester-nylon Composite Microfiber Wiper

Cleanroom wipers are widely used in the fields of electronics, medical care, biological engineering, cleanroom and optical industry. Compared with traditional cleaning cloth, cleanroom wiper has high cleanliness and excellent absorbency. It is ideal in eliminating traces of contaminants in critical environments in the fields of microelectronics, fine mechanics and pharmaceutical, etc. Cleanroom wiper is an effective cleaning tool in the cleanroom.

Cleanroom wipers are divided into several types according to the material used:

1. 100% Polyester

Advantage: High cleanliness, durable, solvent resistant, cost-effective. It is perfect for cleanroom use.

2. 100% Polypropylene (PP)

Advantage: Solvent and heat-resistant, commonly used in the form of non-woven fabric and features excellent oil absorption.

3. 100% Cellulose

Advantage: With excellent absorption for removing contaminants

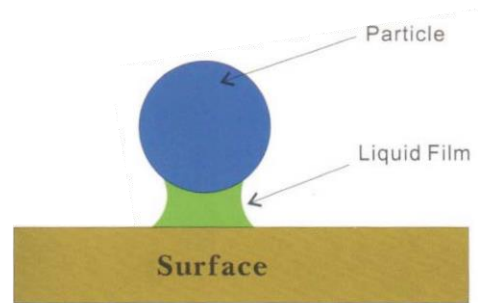

4. 100% Polyurethane (PU) Foam

It is composed of 100 PPI open-cell PU foam with excellent solvent resistance. The open-cell structure of the PU foam gives an excellent absorption capability in removing dust and contaminants. It is commonly used as the head material for swabs.

5. Other wipers

Wipers that fit for some special application such as PVA/PVC foam wiper, cotton wiper, etc.

DEDUST WIPING PRINCIPLE

Thin liquid layer between particle and surface

The mechanism of adhesion between a contaminant particle and the surface. (Refer to Illustration)
 The contaminant is not adhered to the surface directly but through the capillary effect of a layer of liquid membrane. Usually this liquid is water.

The cohesive force between the contaminant and the surface can be calculated by the following formula:

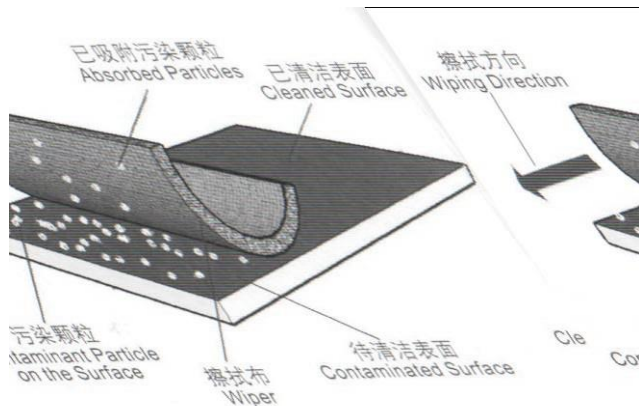

$$F = 2 \pi d \gamma$$

F: the adhesive force

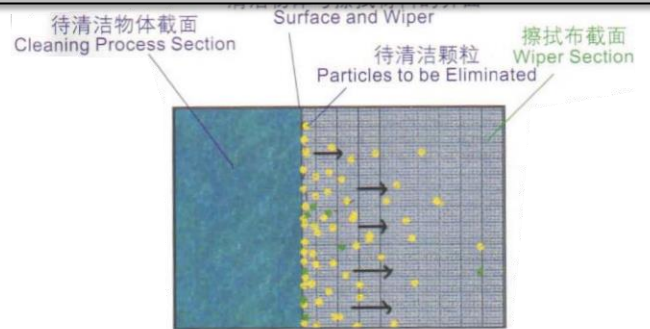

Y: surface tension of liquid membrane

D: particle diameter

Based on this formula, the key to eliminate the contaminant is to change the value of Y, That is the main reason why organic solvents, such as alcohol are good for cleaning.

DEDUST WIPING PRINCIPLE

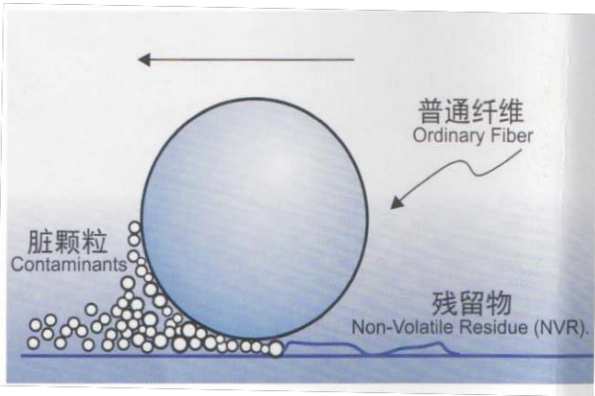

Cleaning involves the process of lowering the adhesion force between the particle and the surface to be cleaned allowing the contaminant to be easily captured by the wiper. It involves a method of balancing the particle content between the surface to be cleaned and the wiper. Volatile solvents such as alcohol which exhibit low surface tension are used to decrease the adhesion force between the surface and particle. The purpose of using alcohol is to decrease the surface tension between the particle and the surface. Aside from particles, organic solvents can also eliminate organic oils.

DEDUST WIPING PRINCIPLE

The contaminants are absorbed by the wiper through the use of organic solvent until the cleanliness level of the surface being cleaned and the wiper reaches a balanced point.

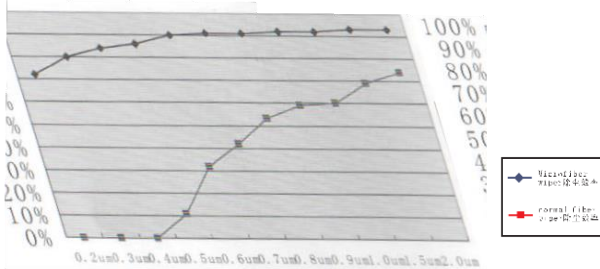

Microfiber is fiber strand less than 0.3 denier fiber. The Wiper made from this fiber has the following advantages:

1. Less than 0.3 denier fiber provide larger contact area cleaning, thus better cleaning performance.
2. Special-shaped fiber structure allows greater contaminant-holding capacity.
3. Combination of polyester and nylon microfiber offers higher abrasion resistance.

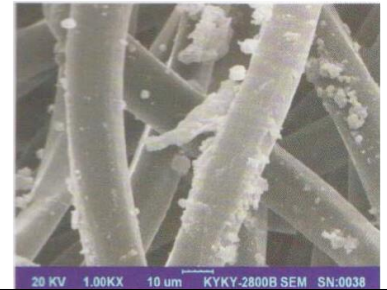

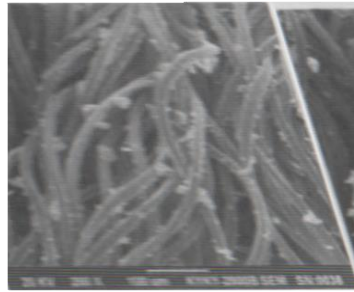

涤纶纤维除尘示意图

Particle Capture Method illustration of Polyester fiber

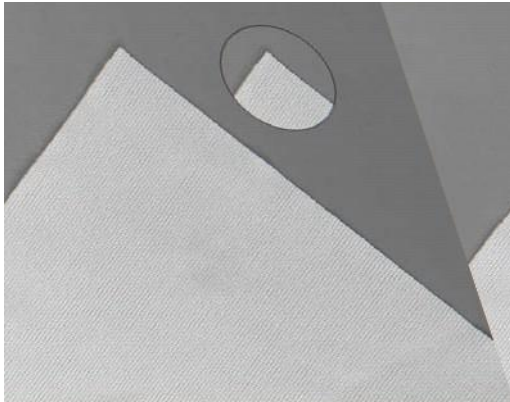

Cleaning Efficiency Comparison Between Ordinary Polyester Wiper and Microfiber Wiper

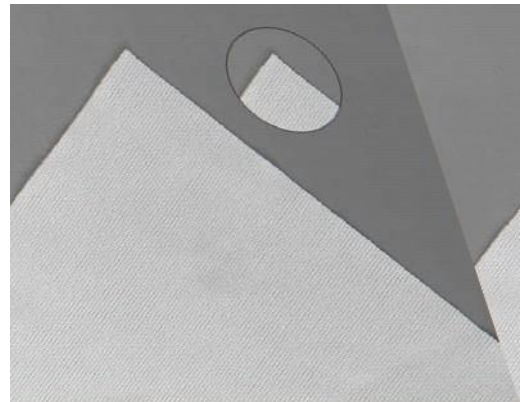

DEDUST WIPING PRINCIPLE

Our cleanroom wiper has excellent absorbency and very low particle release. It can absorb particles and contaminants from surfaces effectively. It complies with the ROHS, REACH standard and are widely used in the fields of hard disk, semiconductor, optical, lcd, pcb, smt, optics and pharmaceutical industries.

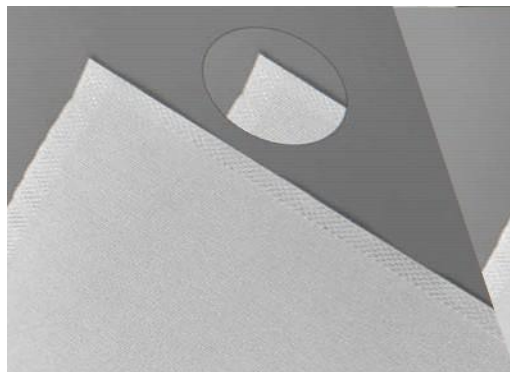

We directly manufacture all types of wipers including woven, knitted, non-woven, foam wipers, ect.

BALGANESH ENTERPRISES

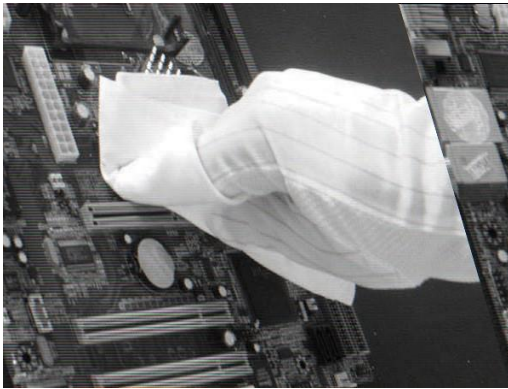

BALGANESH ENTERPRISES

We have several patents of cleanroom wipe edge sealed technology. The edge is flat, smooth, highly flexible, can meet any demanding environmental requirements.

BALGANESH ENTERPRISES

BALGANESH ENTERPRISES

JW Series Polyester Cleanroom Wiper

Features:

- Excellent cleaning effect
- Efficiently fast absorption water and oil
- Use laser sealed edges, low dust
- Soft, no scratches on the surface of wiped products

Applications:

- Semiconductor Industry
- Precision Instrument
- SMT Production Line
- Cleanroom
- Optical Products
- Electronic Industry

Material	100% Polyester
Edge Sealed Way	Laser Sealed, Thermal Sealed, Cold Sealed, Ultrasonically Sealed
Color	White
Size	4"X4", 6"X6", 9"X9", 12"X12", customized size is available

BALGANESH ENTERPRISES

JW Serles LCD Roll Wlper

- SMT
- PCB LCD
- 光

Features:

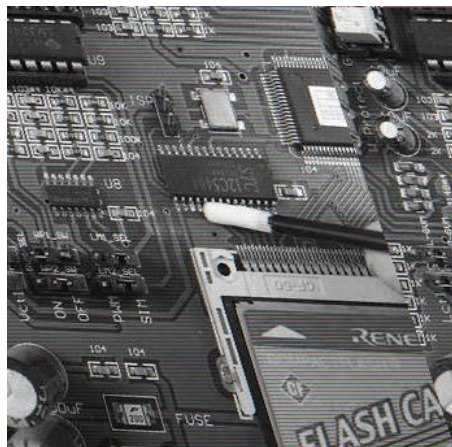

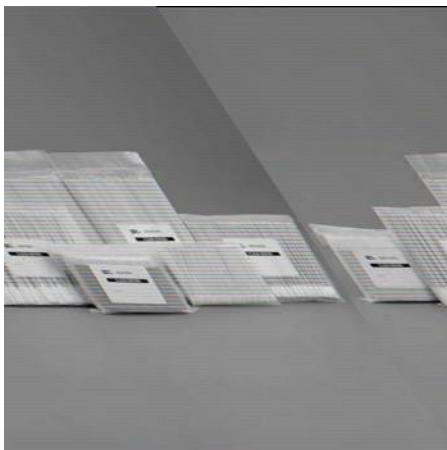

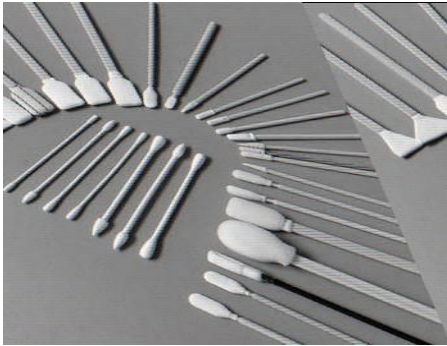

- Use high quality microfiber material
- Good absorption & abrasion resistance
- High flexibility no scratch the surface
- Low Ion content. Efficiently eliminates particles

Applications:

- Semiconductor Industry
- PCB, LCD Industry
- SMT
- Optical Products

BALGANESH ENTERPRISES

JSW Serles Cleanroom Swab

Features:

- Cloth/Foam Tip
- Special sealing edge technology on convergent of sponge/cloth tip
- High absorption, saturately, low particles
- PP or antistatic plastic handle
- Soft, not scratch the surface of wiped goods
- High cleanliness, low dust

Applications:

- Semiconductor Industry
- Precision Bearing
- Medical
- Cleanroom
- Optical Instrument
- Electron Industry

- JSW-5057 PKG:1pc/aluminum foil bag, 2500bags/ctn

BALGANESH ENTERPRISES

Camera Cleaning & Maintenance Kit

Features:

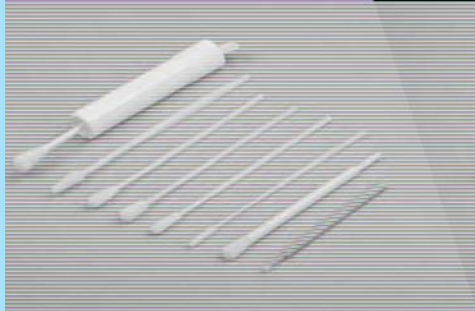

- Lens cleaner is environmentally friendly, non-toxic and volatile.
- Microfiber Wiper effectively captures small dust particles, easy to remove stubborn dust, fingerprints and oil traces.
- In addition, there are sensor cleaning swab, air blower, cleaning brush, dustless cotton swab, microfiber cloth, liquid cleaner and portable box.

Applications:

- It is suitable for cleaning the sensor, lens and screen of camera, and it also can be used for cleaning other digital products such as mobile phones and tablet computers.

BALGANESH ENTERPRISES

Sterile Sampling Swab Series

Why Cells Specimen Collection Flocked Swab

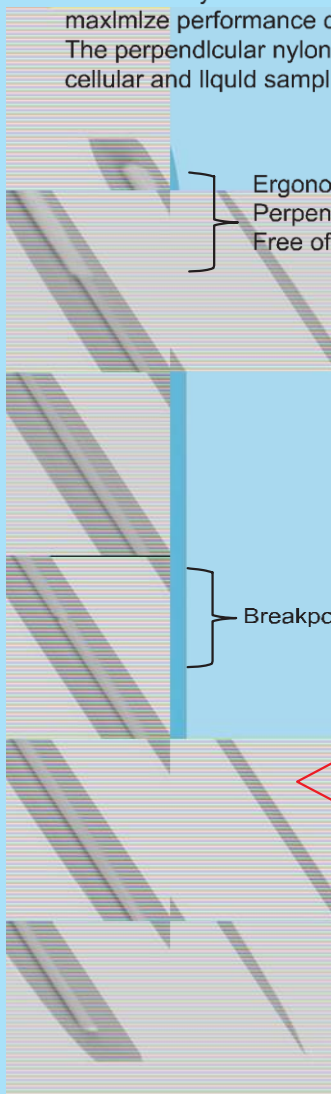

Flocked swabs are ideal for collecting large amount of cells and rapid elution of the specimens instantly release cells into the transport medium. It is well recognized and adopted by the diagnostic test kit manufacturers who produce reagents in molecular genetics, forensics, clinical laboratories sectors.

Design and mould the shape of the tool you want and then "flock" it

Utilising state of the art "spray on technology" the flocking process by means of an electro-static charge perpendicularly attaches millions of nylon microfibers to the medical grade handle tip.

Innovative nylon fibers technology has been implemented on a range of collection devices to help maximize performance during patient sampling.

The perpendicular nylon fibers act like a soft brush, allowing the improved collection and release of both cellular and liquid samples.

Ergonomic and Anatomic Design
Perpendicular Nylon Fibers
Free of Inhibitors And Interference

Breakpoint Mold

Superior Samples Elution
Rapid Absorption (Improved Samples Collection)
Increased Assay Sensitivity

CLEAN ROOM NOTEBOOK

Application: Writing and recording In cleanroom

Material: 100% Wood pulp

Size: A4, A5, A6, B5

Page: 20P, 32P, 50P

Color: Light blue, White

CLEAN ROOM PRINTER PAPER

Material: 100% Wood pulp

Size: A4, A3, A5, B4, or as per your requirement

Color: White, Yellow, Light Yellow, Green, Light Green, Pink, Blue, Light Blue, Sky Blue, Dark Blue, Purple, Orange

Weight: 72gsm, 80gsm

NON WOVEN FACE MASK

Description: Non-woven face mask is made of eco-friendly non-woven fabrics with breathable, non-toxic, flexible, durable and dissolve functions.

Style: Earloop, Tie-on

Ply: 1ply, 2ply, 3ply

Size: 17.5cm x 9.5cm

Color: White, Blue

Packing: 50pcs/bag, 50pcs /box

ACTIVATED CARBON FACE MASK

Description: Activated carbon face mask is made of activated carbon fiber and activated carbon cloth with anti-virus, deodorization, bacteria filtration, dust prevention function.

Size: 17.5cm x 9.5cm

Material: Upper cloth + Activated carbon cloth + Filter paper + Inner cloth

Packing: 50pcs /box or 1pc /bag

PE STICKY ROLLER

Function

Remove dust, no adhesive residual
With perforation line, easily replace

Film Material: Low density polyethylene

Adhesive Material: Water-based acrylic

Size: 2"/ 4"/ 6"/ 8"/ 10"/ 12", Customized size ok

Tackiness: Low / Medium / High

PP STICKY ROLLER

Material: PP

Size: 600mmx20m, 650mmx20m, Customized size

Inner Core Dia: 38mm, 76.5mm

Tackiness: Low / Medium / High

MACHINE SILICONE STICKY ROLLER

Machine Silicone Sticky Roller

Material: silicone

Bearing material: stainless steel

Size: customised size

Tackiness: Low, Medium, High

ANTISTATIC RUBBER STICKY ROLLER

Anti-static Rubber Sticky Roller

Material: Rubber

Handle type: ABS, Black plastic, Aluminum alloy

Size: 2" / 4" / 6" / 8" / 10" / 12"

Tackiness: Low / Medium / High

SILICONE STICKY ROLLER

Silicone Sticky Roller

Application: Silicone Sticky roller can effectively capture dirt, particles, fibers, copper foil and other contaminants in the production process, and transfer dirt to dcr pad.

Material: Silicone

Handle type: ABS, Black plastic, Aluminum alloy

Size: 2" / 4" / 6" / 8" / 10" / 12" / 14" / 16" / 18" / 20"

Tackiness: Low / Medium / High / Super High

DCR PAD

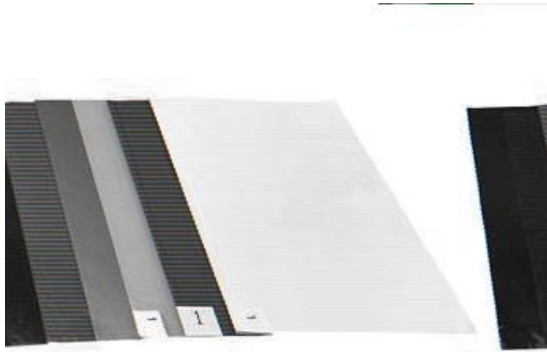

DCR Pad

Description: DCR pad can be used to remove dust separately, also remove the dust on the manual silicone sticky roller to ensure the recycling of the roller.

Material: PVC

Size: 330mm X 240mm X 50sheets

Packing: 50 sheets / pad, 5 pads / Bag

Sticky Mat

Features

- Digital numbering makes it easy to track usage
- Easy to peel off between each layer
- Not easy to transfer adhesive
- Various colors and sizes are available

Film Material: Low density polyethylene

Adhesive Material: Water-based acrylic

Size: 18"X36", 18"X45", 24"X36", 26"X45"

Tackiness: Low, Medium, High, Super high

Sticky Mat Frame

Material: PS Board + Non-slip net

Size: 19"X37", 19"X46", 25"X37", 27"X46"

PS Board Color: White

Non-slip net color: Yellow, Black

ESD GARMENTS

Description:

- Available in 2.5mm & 5mm spacing of grid ESD conductive thread version, 5mm spacing of stripe ESD conductive thread version.
- Left side of the chest with strip to hold work card, Vertical pockets, Cuff with elastic to adjust size
- Stand Collar and Zipper design are effective to control the body dust leaks out

ESD GARMENTS

ESD Gown with Turnover Collar

Description:

- Available in 2.5mm & 5mm spacing of grid ESD conductive thread version, 5mm spacing of stripe ESD conductive thread version.
- Turnover Collar; Cuff with elastic to adjust size
- Zipper design in front is effective to control the body dust leaks out.

ESD GARMENTS

Description:

- Middle open zipper design, Easy to put on /off. Waist, Cuff and Leg Opening areas with elastic to adjust size.
- Cap is connected with body directly; Ears are with mesh fabric for better listening; Velcro on cap to match the face mask.

ESD GARMENTS

ESD Coverall with Oblique Open Zipper

Description:

- Oblique open zipper design, Easy to put on / off, Waist, Cuff and Leg Opening areas with elastic to adjust size
- Cap is connected with body directly, Ears are with mesh fabric for better listening, Velcro on cap to match the face mask.

ESD GARMENTS

ESD Jacket with Stand Collar & Pants

Description:

- Left side of the chest with strip to hold work card, Cuff, Waistband and Leg Opening areas with elastic to adjust size;
- Closing neckline, No pockets and Zipper design in front are effective to control the body dust leaks out.

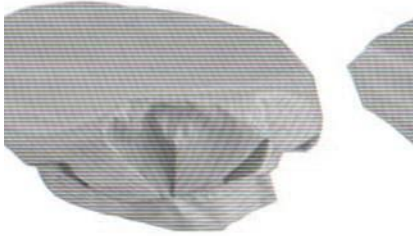

ESD GARMENTS

ESD Jacket with Turnover Collar & Pants

Description:

- Jacket with slant pocket, Cuff, Waistband and Leg Opening areas with elastic to adjust size.
- Zipper design in front to control the body dust leaks out.

ESD Mushroom Cap

ESD GARMENTS

- Made of 100% Polyester filament fiber and Imported conductive wire
- Breathable, Dust-proof & Good ESD effect
- Various Color: Blue, White, Pink, Yellow ect
- Free Size, Comfortable Elastic

ESD Peaked Cap

ESD GARMENTS

- Made of 100% Polyester filament fiber and Imported conductive wire
- Breathable, Dust-proof & Good ESD effect
- Various Color: Blue, White, Pink, Yellow ect
- Free Size, Comfortable Elastic

ESD Dome Cap with Tippet

ESD GARMENTS

- Dome Style
- With breathable mesh fabric on ears place
- With opening and velcro In front side
- Various Color: Blue, White, Pink, Yellow ect
- Free Size

ESD GARMENTS

Antistatic Shoes

Features:

- Light,Firm,Comfortable,Soft,Breathable
- Easy to wash,Dry,Reusable
- Good resistance and ESD performance
- Weather proof,Non-slip,Durable,Chemical resistant

Applications:

- Semiconductor Industry
- Electronic Industry
- Optical Instrument
- Pharmaceutical Industry
- Cleanroom,ESD sensitive area
- Microbial Engineering

ESD EMBOSSED GLOVES

Application: Cleanroom, Semiconductor TFT-LCD and other electronic manufacturing process.

Features:

- Stretchable and comfortable
- Good ESD performance
- Excellent sweat absorption
- Excellent anti-skid effect

Size: S, M, L

Packing: 10pairs/Bag, 1000pairs/Carton

LINT FREE GLOVES

Application: Cleanroom, Semiconductor TFT-LCD and other electronic manufacturing process.

Features:

- Stretchable and comfortable
- Low particles and fiber generation
- Dust Free

Size: S, M, L

PU FINGER COATED NYLON GLOVES

Description: PU finger coated nylon gloves is knitted from nylon fiber with white PU glue coated on fingers

Features:

- Good elasticity and comfortable to wear
- Seamless and no fiber generation
- Washable and reusable

Size: S, M, L

Packing: 10pairs/Bag,300pairs/Carton

PU PALM COATED NYLON GLOVES

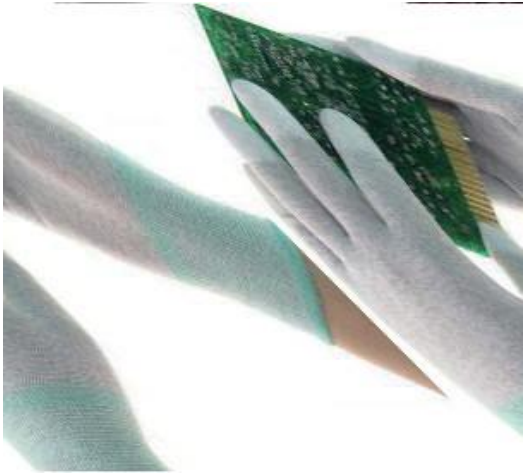

Features:

- Good elasticity and comfortable to wear
- Seamless and no fiber generation
- Washable and reusable

Size: S, M, L

Packing: 10pairs / Bags,300pairs / Carton

PU COATED FINGER CARBON ESD GLOVES

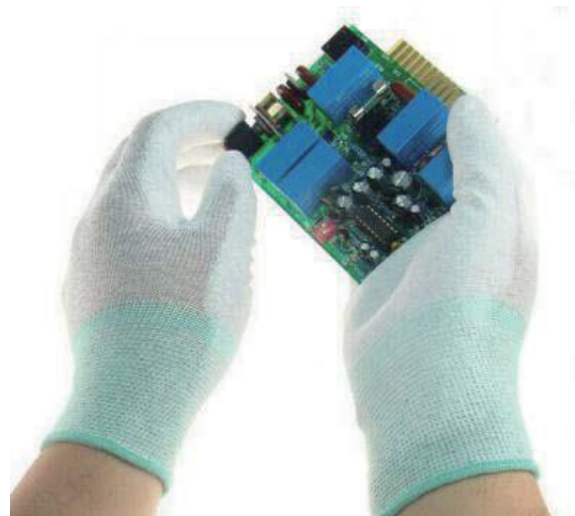

Description: PU Coated Finger Carbon Fiber ESD Gloves are knitted of carbon fiber, Nylon fiber and conductive fiber with white PU glue on fingers

Features:

- ESD, Non-slip, Durable
- Stretchable and comfortable
- Seamless and no fiber shedding
- Washable and reusable

Size: S, M, L

Packing: 10pairs / bag, 300pairs / carton

PU COATED CARBON ESD GLOVES

Features:

- Good ESD performance
- Stretchable and comfortable
- Seamless and no fiber shedding
- Washable and reusable

Size: S, M, L

Packing: 10pairs / bag, 300pairs / carton

PU COATED FINGER COPPER FIBER ESD GLOVES

Description: PU Coated Finger Copper Fiber ESD
Gloves are knitted of Copper Fiber, Nylon Fiber and
Conductive Fiber with white PU glue on fingers

Features

- Good ESD, non-slip, Durable
- Stretchable and comfortable
- Seamless and no fiber shedding
- Washable and reusable

Size: S, M, L

Packing: 10pairs / Bag, 300pairs / Carton

PU COATED COPPER FIBER ESD GLOVES

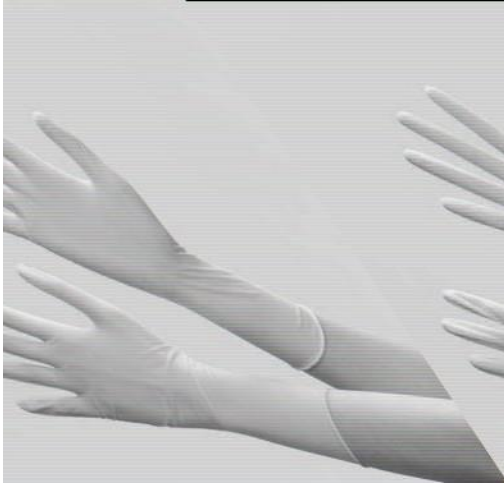

Features

- Good ESD properties
- Stretchable and comfortable
- Seamless and no fiber shedding
- Washable and reusable

Size: S, M, L

Packing: 10pairs/bag, 300pairs/carton

Latex Glove

PU LATEX GLOVES

NITRILE GLOVES

Function: 100% nitrile polymer, no protein allergens

Low dust

Good flexibility & tactility

Length: 9", 12"

Size: S, M, L

Nitrile Glove

PVC Glove

PVC GLOVES

Function: Good flexibility and tactility

Cuff with rolled edge

Ambuyextrous

Length: 9", 12"

Size: S, M, L

FINGER COT

Features

- Powder free, Dust-free, Anti-static
- Soft, Comfortable, Flexible, Wear-resistant
- Rolled type for easy wearing

Material: Latex

Color: Beige, Yellow, Pink, White, Black

Size: S, M, L

Package: 500g / Bag, 20 bags / Carton

SHOE COVER

Features

· Disposable, Water-proof, Anti-skid

· High strength, Anti-tear, Extensible

· Good permeability, Comfortable, Recycle, Eco-friendly

Material: PP Non-woven, PE, CPE

Color: Blue, Purple

Size: 15x36cm, 16x40cm, Customized Size

Package: 10pcs/roll, 10rolls /bag, 50bags/carton
